

# Pet Fire Safety Tips

Chewed wires can not only be a **fire hazard** but also an **electrical hazard**. Hide all wires and secure all lamps, which can be **knocked over** by a climbing cat or running dog.

Make sure **all stove burners** are **off** and open flames **extinguished**. Attach covers on **stove knobs** so they **can't be** turned on accidentally by your dog or cat.

In case of an **emergency** make sure to include your pets in your **evacuation plans**. Keep their leashes **near the door**.
